GPA Applies Final $100 Energy Credit for September

(Fadian, Guam) – The Guam Power Authority (GPA) confirmed that the September energy credit, the sixth and final credit in the current round of direct assistance to Guam's residents, was posted last night. The series of six $100 credits was made possible through the Prugråman Ayuda Para I Taotao-ta Energy Credit program (Public Law 37-104), which made $600 in energy credits available. GPA has uploaded the final $100 energy credit for September 2024 to all active residential and multi-family master meter accounts. GPA is working to reconcile balances and funding needed to apply credits to all remaining active accounts for the month of September.

Governor Lou Leon Guerrero emphasized the critical role of sound financial planning in ensuring sustained relief to residents, stating, "Our ability to deliver these power credits is a direct result of our administration's strong financial management and consistent surpluses. We have always been committed to providing real, impactful assistance to the people of Guam. This $130 million investment proves that when we prioritize fiscal responsibility, we can create opportunities that reduce the burden on our families and businesses."

Lt. Governor Josh Tenorio echoed the Governor's sentiments, highlighting the administration's commitment to supporting residents in meaningful ways, and added, "This program has been a sustained effort to ease the cost of living. Our administration has worked tirelessly to ensure that we not only manage public funds efficiently but also reinvest them back into our community. The power credit program is an important part of that mission, and we will continue to look for ways to provide relief and support to our people whenever possible."

GPA General Manager John M. Benavente, P.E. thanked Governor Lou Leon Guerrero, Lt. Governor Josh Tenorio, and Senators from the 37th Guam Legislature for their ongoing support in making the credits available to customers.

GM Benavente said, "We remind customers that the September credit is the last in this series of direct assistance under Public Law 37-104. To help reduce consumption and save on October power bills, we encourage customers to continue to Beat the Peak during the peak demand hours of 5:00 p.m. to 11:00 p.m. by turning off water heaters and other appliances."

GPA customers can view the credit in their online accounts or their next billing statement. Energy saving tips can be found by visiting GPA's website (guampowerauthority.com), newsletters, and Facebook and Instagram pages (@guampowerauthority).
