Power System Status Update

GPA working to stabilize system, avoid power interruption

(Fadian, Guam) – The Guam Power Authority is providing its customers with the following updates to the generation and power system as of today.

- Baseload unit Cabras 2 work to address vibration issues continue. The expected return to service for the unit is Sunday, October 1, 2023.
- Baseload unit Cabras 1 tripped offline this morning due to loss of vacuum, and some feeders were load shed for less than an hour. As of 2 pm today, the unit is back online and load increasing slowly to 41 megawatts (MW).
- Piti 7 continues to run on limited production. Once Cabras 2 is operating and stable, Piti 7 unit will be offline for repair of plenum and should increase capacity from 20 MW to 31 MW (5-day outage).

GPA has been able to get assistance from large customers participating in the Interruptible Load Program (ILP) and the U.S. Navy. These large customers along with the U.S. Navy voluntarily go off the grid and operate on their standby generators during the periods of time when capacity is less than demand, most especially during our peak hours when demand is highest. We have about 15 to 20 MW of energy from these large customers and U.S. Navy assisting around 6 pm during peak, which helps minimize outages.

Again, our Cabras baseload units are about 48 years old. Emergency repairs are sometimes needed and the units have to be taken offline in a moment's notice to avoid further damage to the machines. Repair work to baseload units are extensive and complex, the unit must cool sufficiently to allow safe entry by generation personnel before repair work can begin.

Other non-baseload generation units like the Combustion Turbines have been running longer hours than normal. These units have only been on an abbreviated preventive maintenance schedule to assist with generation shortfalls. These non-baseload generation units need their required preventive maintenance hours in order for the units to run reliably.

The Mangilao and Dandan solar PV facilities contribute to the total energy production during daylight hours, prior to the evening peak demand. Rainy or overcast days reduces the amount of solar energy the system produces for the power grid. Cloud cover has an impact on how much solar energy the system generates.

To maintain grid stability when customer energy demand exceeds total energy capacity, GPA will, **as a last resort**, implement rotating outages lasting up to 1-hour. Power will be reconnected to all affected customers at the top of each hour. **The attached continuing outage schedule may be implemented beginning Sunday, October 1, 2023 to Sunday, October 8, 2023** to allow customers to plan accordingly should outages be necessary while these critical generation units are under repair.

Customers may have experienced outages caused by other than generation shortfall. These include outages caused by down or damaged power lines, auto-pole collision, brown treesnake, vegetation, or transformer issue which are some of the common emergency power outages affecting customers.

Customers are encouraged to conserve power from 5:00 p.m. to 11:00 p.m. Refraining from using unnecessary air conditioning units and turning off electric water heaters immediately before and during the peak demand hours can significantly assist in reducing energy demand and required load shedding.

We thank you for your continued patience and urge the community to follow our social media pages and website for the latest outage information.

GUAM POWER AUTHORITY
Potential 1-Hr Load Shedding Schedule
October 01 - October 08, 2023

AGANA HEIGHTS | October 01 - October 08, 2023 | Potential Load Shedding Schedule

This schedule is subject to change based on generation capacity and power demand.

6:00 pm – 7:00 pm 9:00 pm – 10:00 pm 1:00 am – 2:00 am	P-283	Chalan Palasyo, Government House, Civil Defense, Agana Heights. Agana Heights Elem. School, BBM Catholic School, CL Taitano Elem. School and surrounding areas.

ANIGUA | October 01 - October 08, 2023 | Potential Load Shedding Schedule

This schedule is subject to change based on generation capacity and power demand.

6:00 pm – 7:00 pm 9:00 pm – 10:00 pm 1:00 am – 2:00 am	P-280	Route 1 northbound Anigua, including Governor's office (Gov. Ricardo J. Bordallo Complex in Adelup), Mobil to House of Chin Fe, Napa and surrounding areas.
6:00 pm – 7:00 pm 9:00 pm – 10:00 pm 1:00 am – 2:00 am	P-281	West O'Brien Dr. left side crossing near Pedro's Plaza to PDN building and Hagåtña Library area, crossing to Chamorro Village, Academy of our Lady of Guam School and surrounding areas.

ASAN | October 01 - October 08, 2023 | Potential Load Shedding Schedule

This schedule is subject to change based on generation capacity and power demand.

6:00 pm – 7:00 pm 9:00 pm – 10:00 pm 1:00 am – 2:00 am	P-280	Route 1 south to Asan village and Asan Park. Route 1 northbound (Ramona St. to Consolacion Ct.) and surrounding areas.

BARRIGADA | October 01 - October 08, 2023 | Potential Load Shedding Schedule

This schedule is subject to change based on generation capacity and power demand.

11:00 pm – 12:00 am	P-211	Route 10 northbound side towards MaiMai Road Area up to DYA, San Antonio St., Lalo Rd. and surrounding areas.
5:00 pm – 6:00 pm 8:00 pm – 9:00 pm 11:00 pm – 12:00 am	P-212	Between Route 10 and Route 8, Barrigada Village Area, Leyang, Canada-Toto Rd., parts of Tiyan (EPA & GPD Headquarters) and surrounding areas.
5:00 pm – 6:00 pm 8:00 pm – 9:00 pm 11:00 pm – 12:00 am	P-213	Route 10 and Route 8 intersection, 76 Station, Radio Barrigada area, up Route 16 to Tiyan ball fields, GDOE Main Office; post office, and to lower Barrigada Heights and surrounding areas.
7:00 pm – 8:00 pm 9:00 pm – 10:00 pm 2:00 am – 3:00 am	P-311	Bello Area Macheche, Tun Pedro Benavente St., Route 16 to Barrigada Heights, DMR and Commercial Tire and surrounding areas.

--continued on the next page--

DEDEDO | October 01 - October 08, 2023 | Potential Load Shedding Schedule

This schedule is subject to change based on generation capacity and power demand.

7:00 pm – 8:00 pm 10:00 pm – 11:00 pm	P-046	Along Route 3 from Route 1 intersection to Potts Junction including Swamp Rd., Machananao, Chalan Kareta and nearby areas; Ysengsong to Fire Station, parts of Astumbo Gardens and surrounding areas.
4:00 pm – 5:00 pm 7:00 pm – 8:00 pm 10:00 pm – 11:00 pm	P-087	Lucky Supplies to parts of Batulo St. (Municipal Golf Course) to Ysengsong, Swamp Rd., Stampa Rd., Chalan Palauan to Machanao area to Astumbo to Ironwood Estates to Route 3, Astumbo Elementary School, Astumbo Middle and surrounding areas.
