Daily Status Report Summary June 30, 2023
Typhoon Mawar Restoration
Day 36 Since COR4 Declared

CUSTOMERS RESTORED:	**93.5%**
GENERATION:	**SUFFICIENT**

KEY RESTORATION EVENTS:

- Service was restored to over 200 customers in the last 24 hours.

Note: Information reflects customers with active service as of report time. Customers with inactive service due to outages, isolated service due to weather head, pedestal or other damage, uninhabitable premises are not included in this data.

ONGOING (Phase III Post-Typhoon Restoration)
Crews are conducting village sweeps to address customers who were previously isolated pending more extensive repair; all lateral lines in each sector; restoring service to customers with completed inspection reports of repaired weather heads; and replacing damaged meters and transformers. **Emergencies are addressed during all phases of recovery.**

AREAS OF FOCUS OVER THE NEXT 1-3 DAYS INCLUDE:
NORTHERN SECTOR
- *NORTHWEST*
  - **Dededo**, various areas including those at and around Ysengsong, Swamp Rd, Chalan Kaskahu
- *NORTHEAST*
  - **Yigo**, various areas including those at and around Chalan Emsley, Chalan Islan Guahan

CENTRAL SECTOR areas at and around:
- *MAIN CENTRAL*
  - **Barrigada**, village, Kanada Rd, Radio Barrigada
  - **Mongmong/Toto/Maite**, various areas including Kanada Rd,
- *NORTH CENTRAL*,
  - **Tamuning/Harmon/Tumon**, various areas
- *SOUTH CENTRAL*
  - **Chalan Pago-Ordot**, Kongga Rd; and along Route 4 toward Sinajana
  - **Sinajana**
  - **Piti**, Nimitz Hill

SOUTHERN SECTOR
- **Hågat**
- **Sånta Rita-Sumai**
- **Målesso'**

Note: Areas of focus are subject to change and may include additional sector areas/villages not listed based on the progress of repair/restoration.

PHASE IV POST-TYPHOON RESTORATION:
Phase IV restoration begins about 2 weeks after Phase III is substantially completed. Specific issues to be addressed in Phase IV restoration includes streetlight repair/replacement and power quality issues.

TRANSMISSION LINE REPAIRS
Repairs to 115kV transmission lines (1 & 2) began today and will continue through the next 2 weeks. Isolated outages may be necessary and will be announced in separate advisories.

GENERATION CAPACITY

- Current operable capacity is 280MW which is adequate for today's projected peak load of 206MW.
- Piti 8 (43MW), Piti 9 (43MW), Cabras 1 (35MW), and Cabras 2 (40MW) are online.

Thank you for your continued patience as we work to restore your power.

Stay updated by visiting our website and social media pages and staying tuned to radio reports and the news for the latest information. GPA encourages everyone on social media to share only information from credible sources.

###

Customers with damaged weather heads should obtain GPA Work Clearance and GPA Inspection Report forms at the GPWA customer lobbies in Fadian (7am – 5pm, Monday – Friday), Julale (8am – 5pm Monday – Friday), and Upper Tumon (7:30am – 6pm Monday – Friday; 8am – 12pm Saturday). Please do not perform repair work on energized electrical lines.

As power lines heat up, weak points of the system will be apparent (e.g., storm damaged transformers, fuse cutouts, lightning arrestors, connections). Crews will do their best to make immediate repairs; if they cannot, they will return to make the repairs as soon as possible. Please report emergency power issues to GPA Dispatch at (671) 475-1472/3/4.

The island-wide power system (IWPS) may be unstable, with fluctuating voltages, power interruptions and intermittencies occurring during restoration and recovery especially after a strong typhoon. Outages or interruptions may occur after power has been restored. This is not unusual as the grid is fragile and a period of system instability will occur until full restoration is completed. GPA will make every effort to have power restored as quickly as possible to its customers. Once full restoration is completed around the island, the system will stabilize and less power interruptions will occur.

Theft of GPA property (wire, meters, streetlights, and other material from islandwide power system) is a crime. Removing these components from the power grid can lead to injury or death. Theft of GPA property also hampers post-typhoon restoration efforts. To report theft of GPA services and property, power meter tampering, and wire thefts, please contact GPA Revenue Protection Service at (671) 648-3199 or email internal-audit@gpagwa.com. All reports are confidential.

Our priority is to restore energy back into your homes and businesses; and restore the island-wide power system online at full capacity. GPA linemen and support crews are working night and day for you, your families, and your businesses. Si Yu'os Ma'åse' for your patience and support.
