

Introduction to Resource Planning & Stakeholder Process

STAKEHOLDER MEETING #1
GPA INTEGRATED RESOURCE PLAN 2021

January 2021

Stakeholder Meeting #1

- **Introduction to Integrated Resource Planning and the Stakeholder Process**
- GPA Strategic Issues
- Work Scope
- Assumptions & Inputs
- Existing Supply Side Resources & Services
- Renewable Integration Study Results
- On the Horizon Programs & Projects
- Next Steps & How You Can Contribute
- Q&A / Open Discussion

What is an Integrated Resource Plan (IRP)?

A dialog between the GPA Planning Group and Stakeholders on the assumptions, drivers, scope, and results, and recommendations of the IRP

A plan to determine what new generation and demand side management programs will provide the least cost power for all customers

A plan that will provide guidance on the types and timing of new resources

A plan that presents options that optimizes over cost, risk and environmental impacts

A plan that sets the stage for action...

What is the IRP's Stakeholder Process?

A public and transparent process that provides:

- Guidance to the GPA team developing the new IRP
- Insight on possible community and customer issues related to new resource development
- A “sounding board” on likely future impacts and examination of “unintended consequences”

***And challenges the status quo –
helping to create a robust plan
for GPA's customers and for Guam***

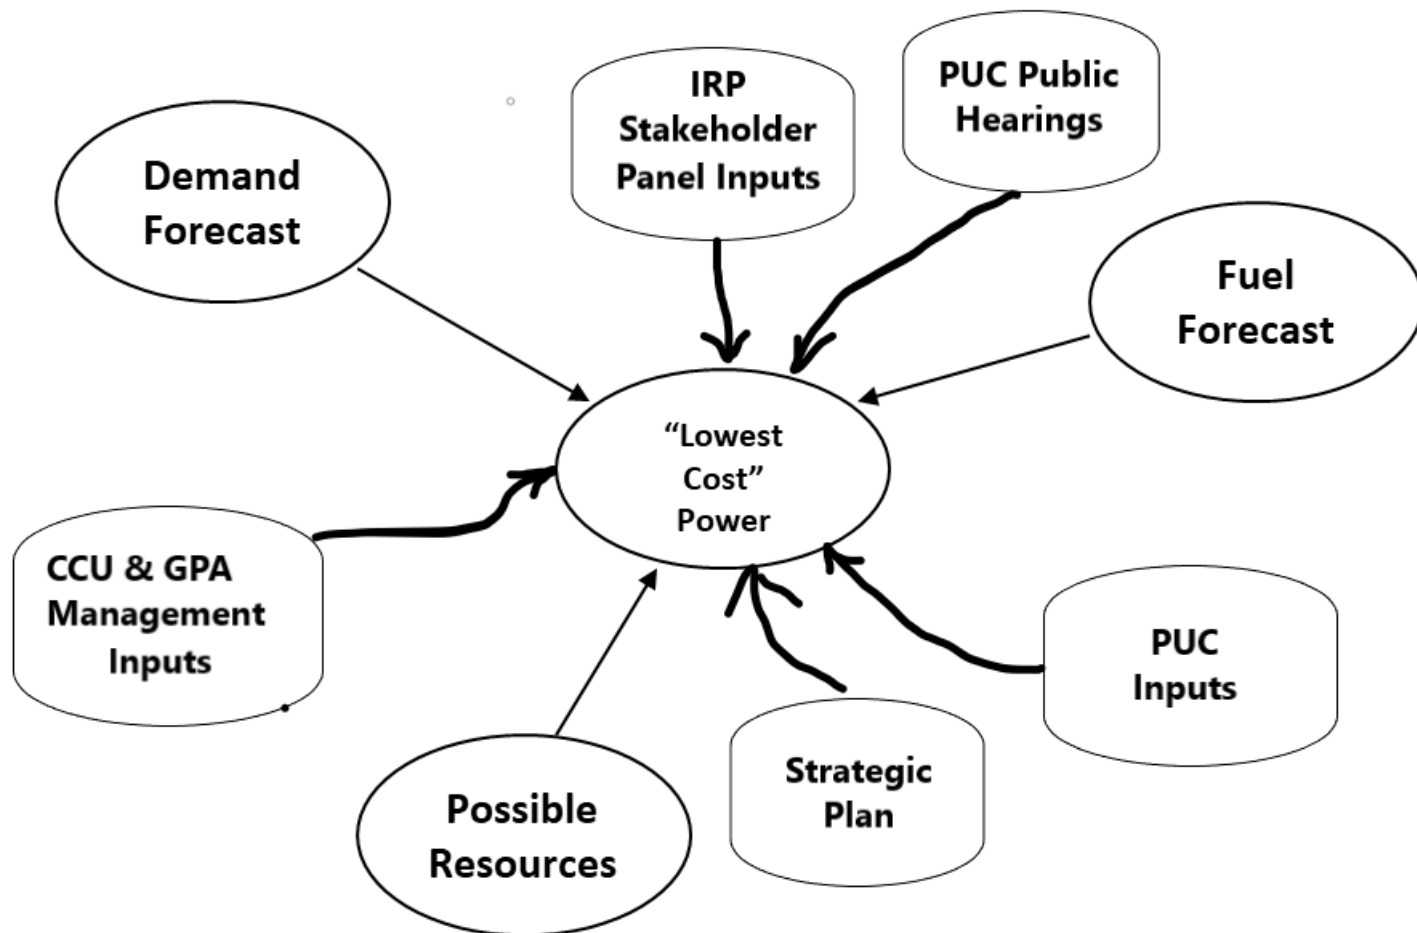

How do we facilitate the IRP process?

The process starts with a series of presentations by GPA's IRP team on background information and issues related to the IRP

Also, each meeting will include a period for questions and comments from the public

Presentations and audio recordings will be posted on GPA's internet site

The Big Picture Goal

Stakeholder Meetings Schedule

Meetings	Date	Topics
